Field Log

Collection

Collect samples before noon.

- Label each vial.
- Keep vials upright.

Measurements

Sample	Volume (mL)
A1	12
B2	7

Note: B2 was collected at dusk.

Handoff

Record all times in UTC.

Calibration Equations

Normalized reading

The baseline is b_0.

$$r = \frac{x - b_0}{s} \tag{1}$$

Combined uncertainty

Use the two component terms.

$$u = \sqrt{u_1^2 + u_2^2} \tag{2}$$
